

eMDnet is your on-line guide to finding and accessing a medical provider anywhere, anytime.

Introducing the premier system for locating and accessing the finest physicians or hospitals anywhere in the United States. eMDnet™ searches to find a provider in your primary network to contain your healthcare costs. If unavailable, it searches for providers in a personalized secondary network which offer the greatest savings available.

With eMDnet™ you receive your passport to medical access while reducing your healthcare cost by creating your own Provider Service Notification™ or PSN. A Provider Service Notification is a medical referral which outlines valuable healthcare information to the provider including -

- Patient information
- PPO network
- Claims Benefit information
- Payer information
- Claims Submission information

Every Provider Service Notification created is directly processed by GlobalCare with the selected provider to ensure the medical claim is correctly processed for savings.

With eMDnet™ you may also produce a personalized Provider Directory along with an eMDnet Identification Card.

Your decision to partner with GlobalCare is an investment in your future success.
