GlobalCare, Inc. announces additional PPO network access with Arizona Foundation for Medical Care.

Atlanta, February 24, 2009 – GlobalCare Inc. is pleased to announce the ability for its payer clients and their covered individuals to properly access Arizona Foundation for Medical Care (AFMC) as an integral component of GlobalCare's PPO network optimization and work flow process management services. Established in 1969, AFMC is one of the oldest and largest Preferred Provider Organizations (PPO) in Arizona with a network of over 12,000 physicians in over 24,000 locations, as well as hundreds of hospitals, urgent care centers, and other ancillary services.

AFMC is a not-for-profit organization governed by a voluntary Board of Trustees, which makes it unique. Because there are no stockholders or investors to pay, financial gains are re-invested into improving service to all of its customers.

AFMC offers 40 years experience in provider relations, claims re-pricing and utilization management. It is the largest, most comprehensive network in Arizona giving resident employees and their covered family members the greatest flexibility when choosing a physician and the confidence of knowing each provider has undergone a rigorous credentialing process.

For additional information regarding Arizona Foundation please call (602) 252-4042 or (800) 624-4277 or visit their Web site at www.azfmc.com.

GlobalCare Inc is a Georgia based corporation providing network management and cost containment services for over 14 years with its headquarters in Alpharetta, GA. Our core business is to maximize the savings on every medical claim by steering members into the most appropriate level of care at the time of any medical event. GlobalCare delivers network optimization and work flow management to return the greatest discounts with the lowest transaction costs. For every member, a best-in-class Primary and Secondary medical network solution is configured to offer the broadest access with the deepest discounts. Through the deployment of proactive, interventionist measures medical costs are controlled at the outset. Payers attain greater efficiency both operationally and financially through utilization of GlobalCare's proprietary technology. Managing the integration of preferred processes and systems is a core competency which creates added-value to our clients by providing access to over 200 trading partners through one connection.

GlobalCare --- Simply More.
